(54) Title: **GAMING MACHINE ELECTRONICS ENCLOSURE**

(57) Abstract: A gaming machine electronics enclosure includes a box-shaped structure comprised of a plurality of members enclosing a volume, the structure further defining an access opening. The enclosure includes a lid for closing off the access opening, the lid being lockable with respect to the structure in a position closing off the opening for securing components contained within the volume. At least one of the members is displaceably arranged relative to the remainder of the members at least when the lid is in an open configuration for facilitating access to an interior of the structure.
